Checklist

1: How old are you?

2: When was the last time you visited a booking website or app?

3: Wich device did you use for your search?

4: How often do you visit hotel booking websites or apps?

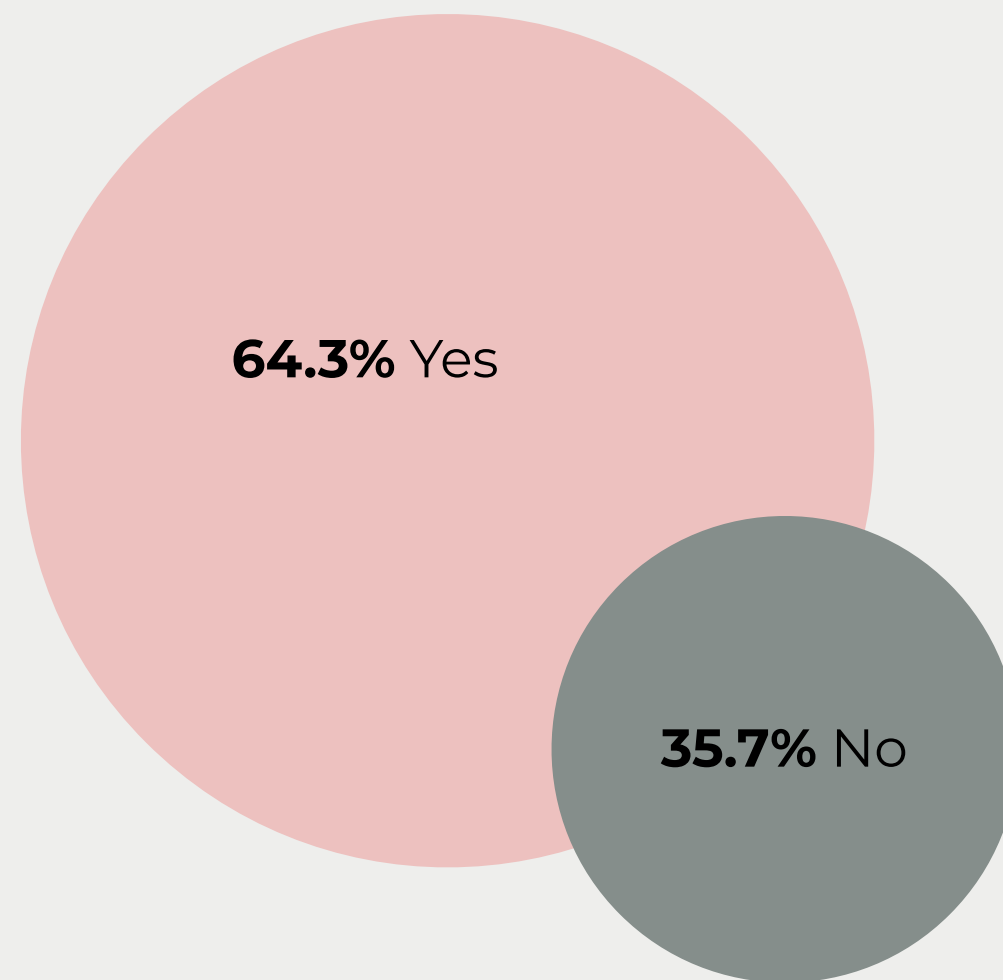

5: Why did you search for a hotel?

6: Which booking websites or apps did you use for your search?

7: Did you end up booking the hotel through the site?

8: If not, why didn't you book the hotel?

9: If yes, how many times did you visit the site bevor booking?

10: How easy was the usability of the site or app?

11: If you could change one thing about the site, what would it be?

Answer 1:

Info like "Only 2 rooms left!" I find interesting and informative, but this should be conveyed less aggressively. It puts you under pressure, you lose the fun in the research and it comes across very manipulative (which it probably should be ...)

Answer 2:

Today the most important thing is the possibility of cancellation. Absolutely necessary is the map clarity. And that you can easily create a clear selection of favorites for yourself. I would prefer to cross out everything on the map that does not fit.

Answer 3:

Don't make it look so old fashioned.
